

Arlene R. Taylor PhD

CV

Dr. Taylor, sometimes referred to as the *brain guru*, specializes in simplifying the complex topic of brain function, with the goal of helping individuals learn to thrive by design. She has spoken to thousands in various venues nationally and internationally.

Her charismatic delivery and the practical and accessible way in which she shares brain function information is as highly entertaining as it is informative, culminating in empowering thousands to alter their thinking in order to improve their health and longevity.

Whether via keynote presentations, lectures, seminars, consulting, radio and television interviews, coaching, electronic media, or numerous articles, mini-monographs, and books, Taylor's impact has spawned success stories from the four corners of the globe. Her

profound and illuminating seminars are life-changing, making her a sought after speaker around the world.

- Adventist Health Systems Northern California 1978-2013: Regional Director for Infection Prevention and Control, Quality, Regulatory, Compliance, and Risk

What People Say

My wife and I were able to attend three of Dr. Taylor's recent presentations in Torrance, California, and were awed by the experience. My wife is a clinical psychologist and we attend at least one health-related presentation each month, including the excellent Torrance Memorial Advantage program forums. Quite seriously, Dr. Taylor's presentations were simply the best I have ever attended. Her communication skills are stunning; my attention never strayed, and I learned so much of value.

—Richard Sherwood, Torrance, CA To use a power word now in vogue to describe you and your seminar—AWESOME! That is how Mary and I felt about your seminar on the brain. In 45 years of academic pursuit and professional career, I have attended a lot of

seminars. Let me be bold and say you, your material, delivery, presentation style—the whole thing was in the top 1%-2% of any I have ever attended. Many thanks.

—Stanley Charles Knapp MD MPH
Historian Consultant for 'Hacksaw Ridge' motion picture
Chairperson, North Carolina Coalition, Email: charles@roosterridge.com

You were quite a hit at our annual Teachers' Education Day! As you well know, individuals who themselves are accustomed to being up front and presenting can make for a challenging audience. In this case, even the stacks of papers some teachers brought with them to grade were being ignored! Not only that, many people came to us throughout the day with incredibly positive comments and appreciation for what you shared in your presentation: *How to Deal with Male-Female Differences in the Classroom*. You made a difference for kids! Thanks for posting the PowerPoint® slides on your website so the teachers can access them.

—Berit von Pohle, Superintendent of Schools, NCC
bvonpohle@nccsda.com

I want to express my deep gratitude for your participation in our recent convention. It was thought-provoking; you had the attendees at the edge of their seats. The concepts shared continued to be repeated and discussed by many during the rest of the day. It was fun observing the dynamics and the laughter generated as a result of the various nuggets from your lectures. Again, thank you for your participation.

—Ramiro A. Cano, President CCC
2820 Willow Avenue, Clovis, CA 93612

Thanks so much for your insights during your presentation of *The Brain Program*. I actually team-teach a class in which we use the MBTI and other inventories (SDI, LBA II, and FIRO-B) and found your work not only terribly compelling, but a great enhancement to address some gaps in these other instruments. Continued thanks to you and for the light you bring into so many lives!
